The tree is proposed based on 10 anonymous cases published by BritainsDNA in February 2014.
 Where alternate SNP IDs exist, the Chromo2 ID is shown first, followed by a slash and the alternate ID.
 The number shown in parenthesis is the number of BritainsDNA cases.
 8 SNPs of Carroll N41845 are in **Bold** on the tree and shaded in the table.
 Carroll N41845 SNPs are based on locations in BIG Y that have variants.
